Projects

Retail Demand Forecasting System using Machine Learning

Jun 2026 - Jul 2026

- Developed a Retail Demand Forecasting System using Python and Machine Learning to predict future product demand from historical sales, inventory, seasonal trends, and promotional data.
- Built an interactive Business Intelligence Dashboard using Streamlit and Plotly to visualize sales analytics, demand forecasts, inventory status, regional performance, and key business KPIs.
- Applied data preprocessing, exploratory data analysis (EDA), feature engineering, and machine learning models (Random Forest/XGBoost) to improve forecasting accuracy and support data-driven inventory optimization and business decision-making.
- Repository Link: <https://github.com/aniket6391/Retail-Demand-Forecasting>

TraceID System : AI-Based Biometric Identification System

Mar 2026 - May 2026

- Designed a fingerprint-based identification platform to support rapid missing person verification.
- Implemented AI-driven matching algorithms and secure data storage for reliable identity authentication.
- Implemented fingerprint-based biometric authentication with MongoDB integration, improving identification accuracy and enabling faster search and retrieval of missing person records.
- Repository Link: https://github.com/aniket6391/Trace_ID

Smart Complaint & Emergency Response System

Oct 2025 - Dec 2025

- Developed a web-based Smart Complaint & Emergency Response System to allow users to register complaints and send real-time SOS alerts for emergency assistance.
- Built a role-based authentication system for Admin and Users, enabling secure complaint registration, tracking, status management, and user access control.
- Designed a responsive and user-friendly interface using HTML, CSS, Bootstrap, PHP, and MySQL, with email/SMS notifications to improve communication and complaint resolution.
- Repository Link: <https://github.com/aniket6391/Smart-Complaint-Response-System>

Certificates

Python for Data Science

Jan 2026 - Feb 2026

IBM

Oracle AI/ML Foundation

Sep 2025 - Oct 2025

CognitiveAI

Skills

Programming Languages : C++, Python, PHP, JavaScript, SQL

Technologies/Frameworks: React.js, Angular, Node.js, Bootstrap

Databases : MySQL, MongoDB

Domain Skills: Data Structures & Algorithms, DBMS, Object-Oriented Programming, Data Analysis

Soft Skills : Problem-Solving, Adaptability & Quick Learning, Time Management

Education

Lovely Professional University

2025 - Present

Master of Computer Applications | CGPA : 8.14

Phagwara, Punjab

Yashwantrao Chavan Maharashtra Open University

2021 - 2024

Bachelor of Computer Applications | CGPA : 6.80

Nashik, Maharashtra

Government Inter College

2019 - 2020

12th — Percentage: 71.4%

Deoria, Uttar Pradesh

Government Inter College

2017 - 2018

10th — Percentage: 83.83%

Deoria, Uttar Pradesh
